## PROFILE

Frontend Developer with more than 1 year of hands-on experience in crafting dynamic and responsive websites and mobile applications using React and Next.js.

My professional experience includes contributing to innovative telemedicine projects, where I honed my skills in building multipurpose website. In addition to my frontend expertise, I have also completed courses in backend technologies such as Node.js and SQL.

## EXPERIENCE

### ○ Frontend developer

STU FEI April 2023 to July 2024

Building a website and mobile app from the beginning for telemedicine project. App is now used in Hospitals. Technologies used: React, NextJS, Redux, MUI.

- Processing data from devices that measures patients medical conditions and showing them on charts with live data.
- Messaging system.
- Complex forms for medical records.
- Adding tasks to patient with date picker and where should go.
- Each patient has own timeline with medical records, devices records and tasks.
- Dashboard menu for doctors for quick statistics and alerts.
- Mobile app made with Capacitor.
- i18n internationalization.
- Authentication using Keycloak and JWT tokens.
- Deploying using Docker.

### ○ Marketing Automation Specialist

Muziker December 2022 to Februar 2023

Editing, implementing and advising further marketing strategies based on customer analysis. Coding with HTML, CSS, Javascript and Jinja2.

- Editing eshop website from marketing perspective and adding weblayers, widgets, banners etc.
- Coding and automating newsletters through Bloomreach (Exponea) platform as well as making analysis.
